Sectors	Industry and Trade
Investment Type(s)	Loan
Investment Amount (USD)	\$ 10.00 million
Project Cost (USD)	\$ 10.00 million

Project Description

Operadora y Procesadora de Productos Marinos (“Omarsa” or “the Company”), an IFC client since 2015, is a fully integrated hatcher, processor, and exporter of shrimp located in Ecuador. Established in 1977, Omarsa is currently Ecuador’s second largest shrimp exporter. The company owns three hatcheries, three shrimp farms totaling 3,748,91 productive hectares (ha), and two processing plants (Abel Gilbert, Las Brisas) with a capacity of 160 thousand tons per year located in Duran, outskirts of Guayaquil. Shrimp farms are located in Chupadores Grande Island (Cachugran) (1,261 ha), Puna Island (1,564ha), and the sector of Chongon (923 ha). The company is certified to multiple internationally recognized sustainability and food safety standards, including Aquaculture Stewardship Council (ASC), Best Aquaculture Practices (BAP), British Retail Consortium (BRC), Naturland Organic and GlobalGAP. The company purchases up to 70 percent of its process throughput in the spot market from 300 pre-approved third-party medium and large shrimp farmers (from 200 up to 3,000 ha). Omarsa’s workforce as of July 2021, not including seasonal workers dedicated to shrimp harvesting activities, totaled 5,250. IFC’s first investment in 2015 was aimed at supporting the expansion of the company’s production and processing capacity, including 500 ha of new ponds in its Puna shrimp farm (<https://disclosures.ifc.org/project-detail/ESRS/36819/omarsa-ecuador>). A second investment was approved in 2017 to finance the construction of the second processing/packing facility (Las Brisas) (<https://disclosures.ifc.org/project-detail/ESRS/39856/omarsa-ii>). Omarsa’s environmental and social performance in the previous investments has been rated as satisfactory. This third proposed transaction entails a US\$[10] million secured A Loan to support the company’s capex plan for 2021-22, which include (i) expanding the brine freezing and cold storage capacity in the plant of Las Brisas; (ii) upgrading water pumping systems in all three (3) shrimp farms; (iii) continue with technification of its farms by investing in solar-powered automatic feeders equipped with hydrophones; and (iv) improving existing quality control laboratories.

Contact Information

ACCESS TO INFORMATION

You can submit a request for information disclosure at: <https://disclosures.ifc.org/#/inquiries>.

If you believe that your request for information from IFC has been unreasonably denied, or that this Policy has been interpreted incorrectly, you can submit a complaint at the link above to IFC's Access to Information Policy Advisor, who reports directly to IFC's Executive Vice President.

ACCOUNTABILITY MECHANISM OF IFC/MIGA

The Compliance Advisor Ombudsman (CAO) is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an IFC or MIGA- financed project. If you submit a complaint to the CAO, they may assist you in resolving a dispute with the company and/or investigate to assess whether the IFC is following its own policies and procedures for preventing harm to people or the environment. If you want to submit a complaint electronically, you can email the CAO at CAO@worldbankgroup.org. You can learn more about the CAO and how to file a complaint at <http://www.cao-ombudsman.org/>
