Project Description

According to the bank, "the North Region Transportation Infrastructure Improvement Project is proposed to help improve Vale's capacity and ability to transport iron ore from its mines to its ports, and to global markets. The Project will help Vale strengthen its operational efficiency through improving its logistics infrastructure. The contents of the Project include upgrade of the transportation infrastructure capacity of Vale's Northern System in the states of Pará and Maranhão, encompassing the Carajás Railway and the Ponta da Madeira Port Terminal."
