## Project Description

According to IFC website, the project consists of subscribing senior bonds to Banco Mundo Mujer for up to COP 80,000 million (approximately US\$25.8 million) to support the growth of the Bank's microenterprise loan portfolio. IFC's financial support and mobilization efforts should send a positive signal to the market, as it would provide medium-to-long term financing through a bond issuance aimed at targeted institutional investors, ultimately deepening financial and capital markets in Colombia.

Further, the development impact of the project is expected to be high as IFC's investment will enhance BMM's ability to support productive micro-enterprises which will in turn stimulate growth, employment generation and poverty reduction. Additionally, the Bank will be able to increase its outreach and sustainability by incorporating new entrepreneurs into Colombia's formal financial sector.
