Project Description

With the support of the World Meteorological Organization (WMO) and its HydroHUB initiative, the main objective of this program will be to conduct detailed assessments at the country level - collecting information and identifying deficiencies - with the objective of contributing and shaping the formulation of a road map for the creation of high-level hydrometeorological services. As well as giving support to the agencies with workshops and seminars of professional update of technicians in the areas related to the evaluation. The activities that are part of this Technical Cooperation will be carried out in countries of the region where, together with the national agencies, problems have been identified during the implementation of the HydroBID system for water resources management.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
