Project Description

Proposed Development Objective(s)

Strengthen social accountability monitoring of EI revenue by enhancing accessibility and use of EI data

Key Results

1. Improvement of revenue administration and revenue management practices, including accountability through better data gathering capacity and access at the national and sub-national levels: This will be measured by the level of coverage and accessibility of disaggregated EI data at local, provincial, and national levels. Key indicators are: (i) awareness programs and public debates organized in four localities; (ii) quarterly report prepared and disseminated; (iii) EI data are fully integrated and consistent across various institutions; and (iv) open data policy is supported by a charter on collaboration for data sharing among stakeholders.
2. Empowerment of governments to develop evidence-based decision making process to reduce inequalities of a spatial nature through subnational EITI reporting: this is measured by the level of integration of data from EITI, the cadaster system, the EI tax revenues, and poverty surveys to better assess the socio-economic impact of mining at local, provincial and regional levels: (i) parliament members, mayors and decentralized government are trained on EI value chains; (ii) EI data are geo-referenced and disaggregated by locality; and (iii) data accessibility and use is enhanced at the local/provincial level.
