Investment Type(s)	Advisory Services
Investment Amount (USD)	$ 0.40 million
Project Cost (USD)	$ 0.40 million

Support for institutional strengthening and infrastructure for trade to seize productive opportunities in Mexico

Project Description

According to the IADB, the main objective of this Technical Cooperation (TC) is to identify Mexico's potential (competitiveness factors and challenges) to expand its participation in strategic global value chains (GVCs), particularly semiconductors, medical supplies (medical devices and pharmaceuticals), critical minerals for the energy transition, among others. In addition, specific interventions (studies, action plans and pilots) are planned to accelerate the development of productive opportunities in the South-Southeast (SSE) region of Mexico by virtue of the public investment that the federal government has allocated to generate greater economic integration of this subregion into the Mexican and global economy, as well as the country's privileged/strategic position in the context of the relocation of GVCs.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
